PROFESSIONAL SUMMARY

Undergraduate in Information Technology (Class of 2027) with an analytical mindset, technical software foundation, and strong focus on Product Management and Data Analytics. Proven track record in scoping product requirements (PRDs), authoring actionable user stories, conducting empirical data analysis using SQL and Python, and coordinating Agile sprint execution. Passionate about bridging technical engineering constraints with user pain points to launch impactful, data-backed digital products.

CORE COMPETENCIES & TECHNICAL SKILLS

Product Management: Product Strategy, PRD Authoring, Agile & Scrum Methodologies, User Stories & Acceptance Criteria, Feature Prioritization (RICE, MoSCoW), User Journey Mapping, Sprint Planning.

Data Analysis & BI: SQL (Complex Joins, Aggregations, Data Extraction), Power BI & Tableau Dashboards, Excel / Google Sheets (Modeling, Pivot Tables), Python (Pandas, NumPy, Exploratory Data Analysis), Funnel & Product KPIs.

Tech Stack & Tools: HTML5, CSS3, JavaScript, Java Programming, React fundamentals, Git & GitHub, AWS Cloud Foundations (EC2, S3), JIRA/Confluence workflows, High-Speed Typewriting.

FEATURED PRODUCT & ENGINEERING PROJECTS

AapThozhi — Multilingual Civic Welfare Support Platform

`React 19 • TypeScript • Web Speech API • CivicTech`

Conceived and developed a voice-first, icon-guided digital companion helping women navigate, identify, and apply for government welfare schemes across 14 Indian languages.

- Authored full product specifications, user personas, and structured user journeys tailored for low-literacy rural audiences.
- Engineered speech-to-text navigation with Web Speech API and designed counter-ready application verification scripts with anti-fraud safeguards.
- Architected modular state management allowing offline guidance caching and low-bandwidth accessibility.

AgriHelp (Agri-Guide-Mini) — AI Agricultural Guidance System

`JavaScript • AI Assistant • UX Research • AgriTech`

Built an accessible agricultural advisory web platform specifically tailored for small-scale farmers in Tamil Nadu with under 1 acre of land.

- Conducted user discovery research on crop viability, soil parameters, and local market price volatility.
- Developed dynamic crop recommendation logic, step-by-step cultivation roadmaps, and an integrated AI farming query assistant.
- Optimized layout for mobile-first accessibility, rapid page loads, and simplified visual inputs.

Product Portfolio & Interactive Casebook

`HTML5 • Tailwind CSS • Vanilla JS • Zine Design`

Engineered an editorial zine-inspired web portfolio demonstrating product management rigor, data analytics frameworks, and clean cross-platform performance.

- Implemented 100% full-screen edge-to-edge responsiveness, automated PDF resume generation, and accessible mobile navigation.
- Structured interactive competency matrices showcasing SQL, Power BI, and product sprint methodologies with GitHub integration.

EDUCATION

B.Tech in Information Technology
2023 – 2027

Tamil Nadu, India

Key Coursework: Data Structures, Database Management Systems (SQL), Software Engineering & Agile Methods, Cloud Foundations, Web Technologies.

LEADERSHIP & CERTIFICATIONS

Learning Vertical Chair
Elected

Lead department technical learning workshops, peer mentorship circles, and technology translation webinars.

Project & Event Coordinator
Academic

Coordinated student technical symposiums, hackathon delegations, and inter-college team project lifecycles.

AWS Cloud Basics Course
Certified

Accredited coursework covering AWS EC2, S3 storage, IAM security, and cloud scalability.

Professional Typewriting Certification
Certified

State-certified high-speed typewriting qualification supporting rapid documentation and PRD authoring.
